

Information Security Policy

Omnia Projects are an Engineering Consultancy providing multidisciplinary expertise to the energy sector.

We are committed to ensuring the confidentiality, integrity, and availability of all our information assets. This is integral to our operational continuity, fulfilling our contractual, legal, regulatory, and business obligations, and meeting the expectations of our stakeholders, including clients, suppliers, and our staff.

We are committed to:

- A continuous process of risk management to identify, assess, and mitigate potential security threats and vulnerabilities.
- Setting objectives and targets as part of our overall business strategy
- Allocating adequate and appropriate resources to ensure the effective implementation of our business management system.
- Striving for continuous improvement, aligning with our organizational goals and business strategy.
- Implement a business management system that meets the requirements of ISO 27001:2022.

Jacob Kilroy, Director of Project Services and Business Support
